

2008 **T**oddler Guide

Baby Signs Potty Training Complete Starter Kit

Dr. Linda Acredolo and Dr. Susan Goodwyn, creators of Baby Signs, have designed a potty training program, **Baby Signs Potty Training Complete Starter Kit**, using sign language with

the goal of having babies out of diapers by the time they reach the age of 2 (also can be used for older children). The kit comes with a Parent's Guide, "All

Aboard the Potty Train" DVD, a board book, reward stickers, and a conductor's whistle that sounds like a milder version of a real train whistle. We found the Parent's Guide not only enlightening, but an enjoyable read. The conductor's whistle really helped make potty training fun for our daughter and reminded her of what she saw on the DVD.
